

Aftercare for all your tech at home, work and on the move

www.af-net.com

Welcome to the world of advanced technology cleaning

AF International has been a leading manufacturer of specialist cleaning products for the IT and Office Products Industry for over 50 years.

Our heritage and values

You can trace AF's roots back over 50 years to the birth of Automation Facilities and the manufacture of effective specialist office cleaning products. Today, AF International operates as a subsidiary business of MacDermid Alpha Electronics Solutions, a global diversified producer of high technology specialty products and a provider of technical services and is a business unit of Element Solutions Inc (NYSE: ESI). Element Solutions Inc is a leading specialty chemicals company whose businesses supply a broad range of solutions that enhance the products people use every day.

AF remains a global leader of specialist PC, workstation, and tech cleaning products. From our Head Office in Ashby de la Zouch, Leicestershire, we export globally and have a growing presence in over 55 countries around the world.

We pride ourselves in offering a high quality product choice backed by thorough research and development to meet the needs of on-going market trends.

Trusted and recommended

AF International is a brand to be trusted, both in terms of product and supply chain. Offering a well-established strong brand image, we thrive on providing first-class product choice to the global market. Our unrivalled, very personal customer service also extends to every corner of the world. You can rely on our helpful, fully trained staff to be up to speed with the latest technological developments and cleaning solutions.

AF's packaging incorporates easily identifiable colours and styles; the Core Range in traditional blue, the Whiteboard Range in brilliant white and the Specialist Cleaning Range in gunmetal grey livery. All AF International products are manufactured at our BS EN ISO 9001:2015, ISO 14001:2015 and ISO 45001:2018 and OHAS 18001 accredited factories.

Cleaning with confidence

Our comprehensive Core Range of cleaning products include, spraydusters, screen cleaners, surface cleaners, cloths and wipes, maintenance products and kits, suitable for cleaning countless products in many different environments. Exceptional results can be expected from these products specifically formulated for office and home workstation freshness.

The AF product range has been carefully developed by our Research and Development Team to provide the very best in cleaning solutions. We are committed to providing a strong selection of products that make cleaning maintenance easy and convenient for everyone. A regular cleaning regime for specific equipment can prolong sustainability, ultimately lowering costs.

The power to deliver on a global scale

AF International has a strategic network of distributors throughout the world; our disciplined network can offer all our customers genuine security of supply. This robust supply chain ensures that we can always respond promptly and deliver a bespoke service, even when the unexpected happens.

in the environment

The world is changing and AF International is resolutely committed to an ongoing sustainability programme, which means we aim to reduce, reuse, rethink and recycle wherever possible.

Our commitment to a more sustainable world

AF International are committed to promoting environmentally friendly products and services in line with on-going changes in the world. Working across our organisation. We aim to encourage recycling methods to our employees and the businesses that we work with to promote a greener way of living and industry. We are a proud member of Valpak who have certified us "zero waste

to landfill" meaning that none of our production or office waste at Ashby is sent to landfill. AF are also a member of the "Plastics Pact" to reduce plastic waste.

Our head office and manufacturing site in Ashby is also making substantial steps to reducing energy and water usage as well as being accredited to ISO 14001 proving that we do not just talk about our commitment to the environment but are also audited to ensure we live up to those claims.

Formulated to be greener

As environmental concerns heighten, continued investment in Research and Development allows AF to remain at the forefront of cleaning technology, frequently exceeding customer expectations. Our in-house Technical Support Team regularly review our cleaning concentrates and the chemicals used therein with a clear objective: could this formulation be greener? AF is a responsible manufacturer with a conscience and is steadfast in its commitment to greener solutions for the future.

Sustainable packaging

Commensurate with our research and development programme for new products, packaging is key in terms of aesthetics, practicality and recyclability. However, a 'sustainable packaging' approach is also taken when reviewing existing products. For example, where possible we have been actively working to reduce plastic packaging, including switching products from more aesthetically pleasing plastic "sleeves" to paper labels.

Reducing the impact of aerosols

AF spraydusters are all HFC free, meaning they have a smaller impact on the environment. AF have also switched all cans used in our aerosol products to tin-plated steel. This requires less energy to produce, and is also easier to recycle with the steel being used in new steel production.

Bulk packs and refill options

In another effort to reduce our environmental impact, AF offer a selection of bulk packs and refill options for most of our popular lines giving the customer the option to re-use refill and recycle.

AF are proud to have been acquired by Element Solutions Inc, a recipient of a Gold Medal from EcoVadis. Element solutions were also ranked as one of the most responsible companies in the USA.

Home and office

The definition of an office has evolved in recent years and AF International have developed a Core Range of products to meet the needs of many different office working environments.

We are living in a world where an office comes in all shapes and sizes; it could be a busy call centre, or a quiet home office. The changing nature of the office environment has prompted AF International to develop cleaning products for multiple uses.

A wide selection of categories highlights the range of exceptional products on offer. Including Spraydusters, Screen cleaning, Surface cleaning, Cloths and Maintenance.

Spraydusters

AF's core range of spraydusters are non-flammable and HFC Free. Available in Standard or Invertible varieties AF's professional spraydusters have been designed to combat dust and debris from inaccessible or hard to reach areas of equipment with an extension straw for precision blasts.
